ADVANTAGES

Simplified and intuitive wiring: the new Merak control units have standardised terminal blocks with different colours depending on the input and output function blocks for maximum ease of connection of operators and accessories.
Obstacle recognition: the D-Track torque management and control system ensures maximum safety for people and property, as well as facilitating certification of the system.

Interconnectivity: the Merak control unit is native to U-link protocol for control of the operator via Bluetooth, 485 serial network or TCP-IP network

PLUS

Magnetic limit switches: this type of limit switch ensures safe and precise installations in any ambient condition

Control unit with programming display: the Merak control unit with programming display with pre-programmed scenarios helps the installer in the programming phase; the control unit is arranged in an oblique way, to facilitate reading and making the settings.

Front screws: this arrangement of the casing screws offers ease and convenience during installation and maintenance, even when there is limited space.

Release lever with personalised key: the release lever simplifies motor release and the personalized key ensures its uniqueness, for better safety

## MERAK C-U-MERAK Built-In

Incorporated control unit for one 24V operator for sliding gates

- Incorporated control unit for one 24V operator for sliding gates
- Board power supply: 230V single-phase
- Operator power supply: 24V 80W
- Main characteristics: removable terminal boards withe new colour standard,simplified programming with scenario display, integrated two-channel receiver, D-Track based antisquashing system and slowdown during opening or closing.
- Main functions;: automatic closing, quick closing, pedestrian passage, people-present operation, maintenance warnings.
- Compatibility: HQSC-D, QSC-D MA

What is U-Link?

The innovative technology that gives you new power

An exclusive Bft innovation: U-Link (Universal Link) is an exclusive Bft platform that allows the creation of technological ecosystems. In Home Automation Access, it allows communication with all the home access automation devices of any brand. So you save time and can control everything with ease, without any worries.

It is intuitive
Easy to install and use

It is scalable
Allows an unlimited number of devices to be added

It is flexible
Allows the creation of groups of interconnected products

It is practical
Works with or without a web connection

It is functional
Parameters can be controlled remotely via dedicated applications

All in one scheme: discover this amazing technology

A unique platform **allowing the creation of technological ecosystems** offering a wide range of solutions for different sectors.

Thanks to the **B-Eba** cards and the **Clonix U-Link receiver, this** proprietary platform featured by Bft products adapts to any protocol and access automation product (even BFT, non-native U-Link or non-BFT products), and **is used in various sectors**. Each device thus becomes smart and can be interconnected with other systems, thanks to a language that becomes universal.

U-Base 2
Software to install and easily and comfortably carry out maintenance and identify any malfunction of U-link compatible operators.

U-SDK
U-Sdk is the innovative application that can make Bft automation systems compatible and easily integrated with a BMS network for the supervision of buildings.

Magistro
An innovative and easy to install system for easily managing all home automation systems.

U-Control
U-Control is the application that helps the quick and easy integration of BFT automation systems in large building management systems.
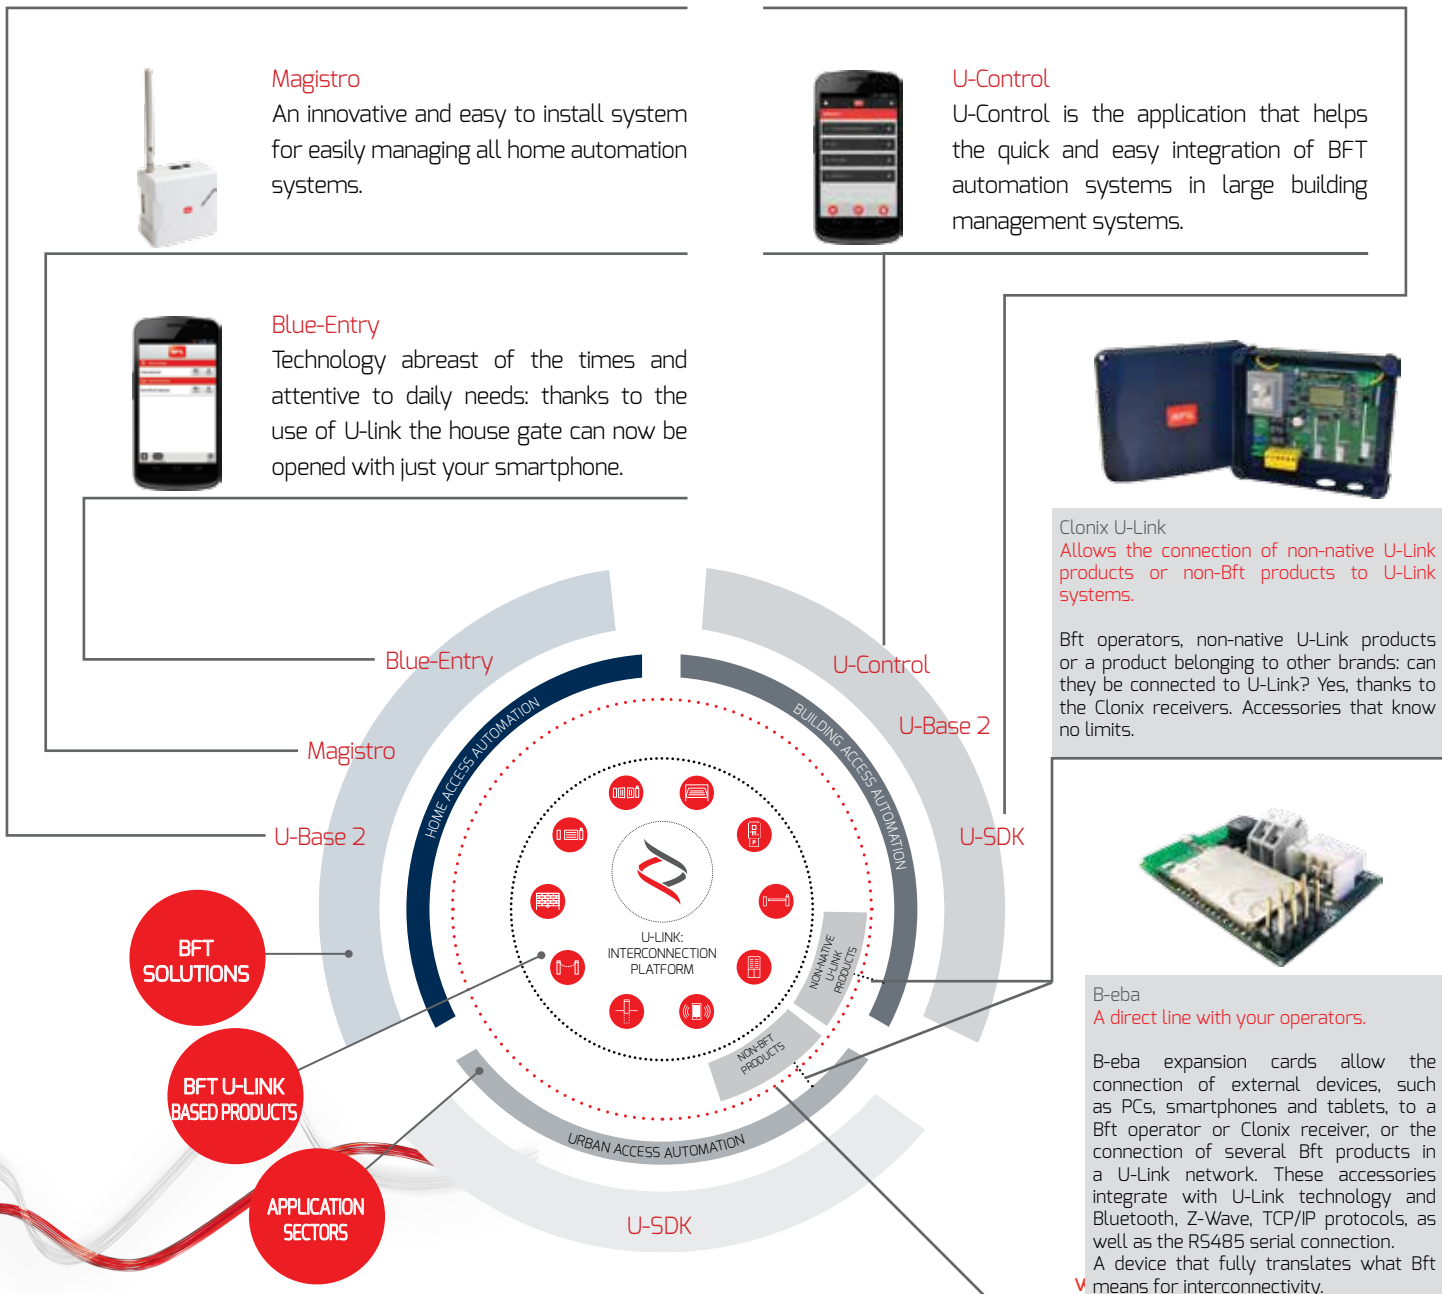

Blue-Entry
Technology abreast of the times and attentive to daily needs: thanks to the use of U-link the house gate can now be opened with just your smartphone.

Clonix U-Link
Allows the connection of non-native U-Link products or non-Bft products to U-Link systems.

Bft operators, non-native U-Link products or a product belonging to other brands: can they be connected to U-Link? Yes, thanks to the Clonix receivers. Accessories that know no limits.

B-eba
A direct line with your operators.

B-eba expansion cards allow the connection of external devices, such as PCs, smartphones and tablets, to a Bft operator or Clonix receiver, or the connection of several Bft products in a U-Link network. These accessories integrate with U-Link technology and Bluetooth, Z-Wave, TCP/IP protocols, as well as the RS485 serial connection.
A device that fully translates what Bft means for interconnectivity.
